10-Jan-25

Manasvini T
Bangalore, India

Dear **Manasvini T**,

On behalf of **KPMG Global Services Private Limited** (the 'Company'/'Firm'), we are pleased to offer you an opportunity of Internship. You will be part of the **Consulting** team at our **Bangalore** and shall be designated as a "Trainee". As mutually agreed, your internship will be for a period starting from **27-Jan-25 to 25-Jul-25**.

During this period, you will be paid a stipend of **Rs 20,000 per month**. For all other policy guidelines kindly refer to the isek (policy hub), which shall be read as part and parcel of the terms hereof.

Provisional Offer

The offer also is subject to your completion of, to the Company's satisfaction, comprehensive background screening procedures, including without limitation, education, residence, identity and other verifications; criminal records and civil database checks; and various compliance authority checks. You further consent to the collection, storage and independent verification of the information provided to the Company and/or any background screening service provider of the Company. In the event it is discovered at any stage that any information/particulars and/or details provided by you are incorrect and/or any material information has been withheld/suppressed by you, the same shall constitute breach of discipline and your services will be liable to be terminated with immediate effect without notice and with no liability to make any further payment to you.

Working Hours

You will be required to be available for your internship eight (8) hours a day excluding thirty (30) minutes break for meals. The Company practices a forty (40) hours workweek. Subject to the applicable law, work timings, schedules and shifts may vary from time to time based on customer service requirements and depending upon exigencies of business, as specified by the Company from time to time. You may be required to work additional hours as appropriate to fulfill the responsibilities of your role.

COMPLETION CERTIFICATE

ACKNOWLEDGEMENT

This Internship is a result of accumulated guidance, direction and support of several important persons. We take this opportunity to express our gratitude to all who have helped us to complete the Internship.

We express our sincere thanks to our Principal **Dr. B G Prasad**, for providing us adequate facilities to undertake this Internship.

We would like to thank **Dr. Vindhya P Malagi**, Head of Department – AI & ML, for providing us an opportunity to carry out Internship and for her valuable guidance and support.

We would like to thank **Mrs. Parvathi Devi M**, ISTRAC, ISRO, for guiding us during the period of internship.

We express our deep and profound gratitude to our Internship Co-ordinator, **Prof. Kavya D N**, Assistant Professor – AI & ML, for her keen interest and encouragement at every step in completing the Internship.

We would like to thank all the faculty members of AI & ML department for the support extended during the course of Internship.

We would like to thank the non-teaching members of the Department of AI & ML, for helping us during the Internship.

Last but not the least, we would like to thank our parents and friends without whose constant help, the completion of Internship would have not been possible.

Manasvini T [1DS21AI031]

CHAPTER 1

INTRODUCTION

The internship program at **KPMG Global Services** provided me with an opportunity to gain valuable industry exposure and practical experience in the field of **Internal Audit Controls** within the **Financial Sector**. This internship was undertaken as a part of the academic curriculum for the Bachelor of Engineering in **Artificial Intelligence and Machine Learning** at **Dayananda Sagar College of Engineering**.

The internship was designed to enhance both technical and professional competencies through a combination of structured training, leadership activities, and hands-on learning. Over the course of the internship, I underwent comprehensive training on tools such as **AWS, Excel, PowerPoint, Alteryx, Visio, GenAI, and Prompt Engineering**. These sessions laid the foundation for understanding various aspects of data handling, automation, and cloud-based tools relevant to audit and consulting environments.

In the later phase of the internship, I participated in leadership and team-based activities, completed a mini capstone project, and began shadowing professionals in the Internal Audit team. This real-time exposure helped me understand key auditing workflows, risk and control mechanisms, and common industry terminologies used in audit documentation and reporting.

This report presents an overview of my learnings, observations, and experiences gained throughout the internship journey at KPMG.

.

CHAPTER 2

DESCRIPTION OF ORGANIZATION

KPMG GLOBAL SERVICES

2.1 Overview

KPMG (Klynveld Peat Marwick Goerdeler) is a global network of professional services firms providing a wide range of services in the areas of **Audit, Tax, and Advisory**. It is one of the renowned "**Big Four**" accounting organizations, with a strong international presence in over **145 countries and territories**, and a global workforce exceeding **275,000 professionals**. The firm works with businesses, governments, and non-profit organizations to provide expert guidance, ensure regulatory compliance, and help solve complex business challenges.

KPMG is recognized for its unwavering commitment to integrity, quality, and excellence. Its client-centric approach is backed by deep industry insights, robust technology integration, and a culture of innovation and continuous improvement. KPMG's services cover multiple sectors including finance, healthcare, infrastructure, technology, energy, and consumer goods.

In India, **KPMG Global Services (KGS)** operates as a key global capability center located across several cities, including Bengaluru, Gurugram, and Pune. KGS plays a vital role in supporting KPMG member firms around the world by providing scalable and high-quality services across internal audit, risk management, financial analysis, technology consulting, and more.

KGS functions as a hub of operational excellence, where talent, technology, and domain expertise come together to deliver value-driven solutions. It emphasizes a collaborative and inclusive work environment, offering interns and professionals exposure to global practices and standards. Through knowledge sharing, digital transformation initiatives, and a strong focus on ethical practices, KPMG continues to make a significant impact in both local and global markets.

2.2 Vision and Mission

Vision:

KPMG's vision is to be the Clear Choice – the standard of excellence – by being the most trusted professional services firm for its clients, people, and society.

Mission:

KPMG's mission is to turn knowledge into value for the benefit of its clients, people, and the capital markets. This is achieved through professional integrity, deep insight, and consistent focus on creating meaningful outcomes.

CHAPTER 3

SCOPE OF WORK

During my ongoing internship at **KPMG Global Services**, I have been engaged in activities that span both technical training and real-world exposure to auditing practices within the **Internal Audit Controls team**, specifically in the **Financial Services domain**. The scope of my work has been structured to provide a comprehensive understanding of the tools, methodologies, and workflows used in professional auditing environments.

1. Structured Technical Training

The initial phase of the internship focused on **comprehensive technical training** aimed at building a strong foundation in tools and platforms widely used in internal auditing, data processing, and consulting environments. These included:

1. **Amazon Web Services (AWS):** Introduction to cloud computing fundamentals, storage systems, and virtual computing environments used in modern audit setups.
2. **Microsoft Excel:** Mastery of data cleaning, formulas, pivot tables, charts, and macros—essential for financial data analysis and audit documentation.
3. **Microsoft PowerPoint:** Learning how to communicate insights through professional-grade business presentations, enhancing both content clarity and visual storytelling.
4. **Alteryx:** Exposure to low-code data automation workflows, including data input/output, blending, and transformation processes relevant for audit testing.
5. **Microsoft Visio:** Process mapping and flowcharting for visualizing business processes, internal control mechanisms, and audit cycles.
6. **GenAI and Prompt Engineering:** Understanding how AI tools like ChatGPT can be used to streamline documentation, generate audit insights, automate repetitive tasks, and draft audit communications efficiently.

This technical training allowed me to build a versatile skill set applicable to data-intensive and process-oriented roles.

2. Leadership and Soft Skill Development

KPMG places a strong emphasis on holistic professional growth, and I was encouraged to participate in multiple **team-building and leadership activities**. These sessions were focused on:

1. Enhancing interpersonal and communication skills through role-playing, group discussions, and leadership simulations.
2. Building confidence in stakeholder engagement through mock presentations and scenario-based problem-solving.
3. Developing time management, conflict resolution, and collaborative decision-making skills—critical attributes for audit professionals who work with cross-functional teams.

These activities were instrumental in preparing me for real-world work environments where both technical skills and human skills are equally valued.

3. Capstone Project

As part of the internship, I was assigned a **mini capstone project** that simulated a real audit scenario. The objective was to integrate and apply all the tools and skills gained during training in a practical use case. The project involved:

1. Identifying a business process to evaluate (e.g., expense management or procurement process).
2. Using **Excel and Alteryx** to clean and analyze a sample dataset for inconsistencies or control gaps.
3. Mapping out the process using **Visio**, highlighting potential risk areas.
4. Creating a final audit summary and recommendations in **PowerPoint**, structured as a professional client deliverable.

This project served as a critical transition between theoretical learning and practical application, encouraging independent problem-solving, time management, and strategic thinking.

4. Shadowing Internal Audit Professionals – Financial Sector

Currently, I am in the **shadowing phase** of my internship, where I am actively observing and learning from experienced audit professionals working in the **Internal Audit Controls team**. This real-time exposure includes:

1. Understanding the **end-to-end audit workflow**, from initial planning and risk scoping to fieldwork, control testing, documentation, and reporting.

2. Observing how internal controls are evaluated for **financial compliance, fraud detection, and operational effectiveness**.
3. Learning to read and interpret **control matrices, risk and control documentation, and audit workpapers**.
4. Attending internal discussions and review meetings to understand how issues are escalated, findings are drafted, and audit conclusions are presented to stakeholders.
5. Familiarizing myself with **terminologies and standards** such as risk rating, control objectives, COSO framework, and audit sampling.

Shadowing has deepened my understanding of how internal auditors play a crucial role in enhancing corporate governance, reducing financial risk, and ensuring regulatory compliance in financial institutions.

5. Future Scope

As I progress through the remaining weeks of my internship, I look forward to gaining more hands-on involvement in specific audit tasks, possibly contributing to walkthroughs, audit documentation, and drafting initial observations under guidance. I also aim to further improve my proficiency with the tools and frameworks used by the audit team and build a well-rounded understanding of internal audit functions in a global financial services context.

CHAPTER 4

LEARNING OBJECTIVES

The internship at **KPMG Global Services** has been a transformative experience, offering a balanced blend of technical training, business exposure, and mentorship. My learning objectives were carefully aligned with the core values of internal auditing, including governance, risk management, compliance, and process improvement. As a trainee in the **Internal Audit Controls – Financial Services** domain, I set out to accomplish the following learning goals:

1. **Building a Strong Foundation in Internal Audit Methodologies:**

One of my primary objectives was to gain a robust understanding of how internal audits are conducted in a corporate environment. Through structured learning and shadowing experiences, I aimed to:

- Learn the **phases of an audit lifecycle**, including audit planning, risk scoping, control identification, fieldwork, documentation, and reporting.
- Understand the **role of auditors** in evaluating the effectiveness and efficiency of internal controls across financial and operational processes.
- Grasp how audits contribute to **transparency, accountability, and compliance** within an organization.

By observing real-time audits and review meetings, I am being able to connect theoretical audit principles with actual business scenarios.

2. **Gaining Deep Exposure to Risk Management Practices**

A critical component of internal auditing is risk management. During my internship, I focused on:

- Learning how organizations identify inherent and residual risks that may impact business performance or regulatory compliance.
- Understanding how risk assessments are conducted during audits to prioritize high-impact areas for control testing.
- Gaining familiarity with risk control matrices (RCMs), control objectives, risk ratings, and how these tools guide the audit strategy.

- Observing how audit professionals assess and report on control gaps that could potentially lead to financial loss, fraud, or reputational damage.

Through this, I began to appreciate the strategic value that risk-focused auditing brings to decision-making and business sustainability.

3. Understanding Internal Controls and SOX (Sarbanes-Oxley) Compliance

One of the most valuable learnings from this internship has been understanding the importance of internal controls, especially in the context of regulatory frameworks like SOX 404. My objectives included:

- Learning the five components of the COSO framework—control environment, risk assessment, control activities, information & communication, and monitoring.
- Observing how internal controls are tested for design and operating effectiveness, particularly over financial reporting (ICFR).
- Gaining an introduction to SOX compliance, including the need for documented evidence, management assertions, and external auditor reliance.
- Understanding how deficiencies are categorized (control vs. significant vs. material weakness) and their potential implications on audit outcomes.

This knowledge helped me see the connection between internal controls and broader regulatory compliance mandates.

4. Enhancing Technical Proficiency with Audit & Analytics Tools

A major goal was to become proficient with tools that are critical in internal audit workflows. Through hands-on labs, training, and guided tasks, I aimed to:

- Master Microsoft Excel for data analysis, validation, pivoting, and trend detection.
- Learn PowerPoint for creating clear and professional audit reports and visual presentations.
- Use Alteryx for automating data workflows, cleaning, and preparing datasets for audit testing.
- Create process flows using Microsoft Visio to visually document control procedures and identify potential bottlenecks or risks.
- Explore AWS (Amazon Web Services) to understand how cloud platforms are integrated into enterprise IT environments and the relevance of ITGCs (IT General Controls) in audits.
- Experiment with GenAI tools and prompt engineering to automate content generation, improve documentation speed, and enhance audit reporting.

These tools enhanced my analytical thinking and exposed me to the digital shift in modern audit practices.

5. Developing Professional, Communication, and Leadership Skills

In addition to technical knowledge, I aimed to improve my interpersonal and soft skills, which are essential in a client-driven, team-oriented work environment. This included:

- Participating in leadership workshops and team-building activities to develop collaboration, decision-making, and time management abilities.
- Learning how to communicate audit findings, discuss risks with team members, and prepare professional audit documentation.
- Observing how senior auditors interact with clients, present observations, and maintain professional integrity and independence.
- Embracing the importance of ethics, confidentiality, and accountability—core values of KPMG and the audit profession at large.

6. Gaining Real-Time Business Exposure through Shadowing

Through the shadowing experience, I was able to observe and participate in live projects within the internal audit team. This immersive exposure helped me:

- Apply theoretical knowledge in real-life situations.
- Learn industry terminologies and gain context on how internal audits are scoped and executed in financial institutions.
- Understand how audit insights are translated into business recommendations for risk mitigation and control improvement.
- Appreciate the significance of timely audits in supporting business continuity, risk reduction, and stakeholder confidence.

This internship has provided me with a holistic learning journey, helping me understand not only the technicalities of internal auditing but also the strategic impact of governance and risk management in financial services. It has strengthened my foundation for future roles in compliance, data analytics, consulting, or audit.

CHAPTER 5

CHALLENGES AND SOULTION

The internship provided immense learning opportunities, but also came with challenges that pushed me to grow technically and professionally. Each obstacle served as a stepping stone, allowing me to develop critical thinking, adaptability, and problem-solving skills. Below are some of the key challenges I faced and how I approached them:

1. Grasping Audit Terminologies and Frameworks

Exposure to industry-standard frameworks such as **SOX (Sarbanes-Oxley Act)**, **ICFR**, and **COSO** posed an initial challenge due to the technical complexity and depth involved. The specialized vocabulary and processes used in internal audits required considerable effort to comprehend.

Solution:

To bridge this knowledge gap, a glossary of terms was maintained, and reference materials were used to develop conceptual clarity. Participation in discussions and observation during shadowing sessions facilitated the practical application and understanding of these frameworks in audit activities.

2. Adapting to Professional Communication Standard

Communicating effectively in a professional environment, especially in written formats such as emails, audit notes, and presentations, required a clear, structured, and formal approach that differed significantly from academic writing styles.

Solution:

Observation of team communication patterns, study of internal documentation templates, and feedback from mentors enabled the gradual improvement of communication standards. This ensured clarity, professionalism, and accuracy in conveying information.

3. Managing Multiple Tools and Learning Platforms Simultaneously

Simultaneously learning multiple platforms—such as Excel, PowerPoint, Alteryx, Visio, AWS, and GenAI tools—proved to be demanding, particularly in aligning tool usage with real-time project requirements and audits.

Solution:

A task-based learning strategy was adopted, focusing on the application of tools in context-specific scenarios. Structured practice sessions and tool-specific mini-projects enhanced familiarity and practical proficiency.

4. Operating in a Remote/Hybrid Work Setup

Engaging in effective collaboration, maintaining workflow transparency, and coordinating tasks in a virtual or hybrid environment presented challenges in communication and task alignment.

Solution:

Active participation in virtual meetings, frequent status updates, and consistent documentation of tasks using tools such as Microsoft Teams and OneNote ensured continuity and synchronization with team objectives. A proactive approach helped maintain productivity and responsiveness.

5. Bridging the Gap Between Theory and Practice

Aligning academic concepts of auditing and analytics with practical implementation in real-world financial services settings was a significant challenge. Practical exposure highlighted the complexity of actual audit procedures and the nuances of business risks.

Solution:

Review of real-time audit documentation, direct involvement in shadowing assignments, and continuous learning through mentorship helped in contextualizing theoretical knowledge. These efforts supported the development of practical insight into internal controls, risk mitigation, and governance.

CHAPTER 6

ACHIEVEMENTS AND CONTRIBUTION

The internship is currently in its initial learning phase, during which several significant milestones have been accomplished through structured training sessions, guided learning modules, and active participation in shadowing activities. These early-stage contributions reflect steady progress in developing technical proficiency, adapting to a professional corporate environment, and demonstrating a strong commitment to acquiring industry-relevant knowledge and skills.

1. Completion of Foundational Training Modules:

Successfully completed in-house training programs on essential tools and technologies including **Microsoft Excel, PowerPoint, AWS, Alteryx, Visio, and Generative AI platforms**. These sessions were designed to build baseline proficiency in digital tools frequently used in audit and consulting workflows, enabling better alignment with ongoing team tasks.

2. Participation in Pluralsight Learning Paths:

Enrolled in and completed **curated courses on Pluralsight**, as recommended by the organization, to build deeper understanding of audit fundamentals, cloud technologies, and data analysis techniques. These self-paced learning modules supplemented the primary training and provided valuable technical insights relevant to the financial services domain.

3. Active Involvement in Leadership and Team Activities:

Took part in structured team-building and leadership-oriented exercises during the initial phase of the internship. These sessions focused on developing interpersonal skills, professional etiquette, collaboration, and problem-solving within a corporate setting — critical soft skills for working effectively in a multidisciplinary team environment.

4. Shadowing Internal Audit Operations:

Actively engaged in shadowing senior team members involved in internal audit processes within the financial services sector. Observations included exposure to walkthroughs, internal control documentation, SOX compliance, testing procedures, and the usage of risk and control matrices. This phase allowed for contextual learning and understanding of how theoretical audit principles are executed in practice.

5. Understanding of Governance, Risk, and Compliance (GRC) Concepts

Developed a strong foundation in risk management frameworks, ICFR (Internal Controls over Financial Reporting), SOX (Sarbanes-Oxley Act), and other regulatory requirements. Gained insights into how internal controls support business integrity and how compliance is maintained through systematic documentation and testing.

6. Supportive Contribution to Team Tasks

Provided assistance in organizing data files, preparing simple documentation, and conducting preliminary reviews under supervision. Though minor, these contributions supported the team's operational flow and served as a hands-on opportunity to apply newly learned concepts.

7. Participation in Capstone Project

Engaged in a small-scale capstone project during the training phase, focusing on practical application of learned skills. The project helped strengthen conceptual clarity, team coordination, and problem-solving in a simulated business scenario.

CHAPTER 7

REFLECTION AND ANALYSIS

The internship at KPMG has been a highly enriching and formative experience, offering invaluable exposure to the internal auditing practices and the operations of a global professional services firm. The structured training, coupled with hands-on shadowing, has allowed for a deeper understanding of audit processes, risk management, and compliance standards within the financial services industry.

A key takeaway from this internship has been the significant transition from academic learning to real-world applications. In academia, the focus is on theory, but in the professional world, the emphasis shifts to practical execution, process optimization, and maintaining stringent standards. Through this experience, it became evident that **attention to detail**, **critical thinking**, and **process orientation** are fundamental to ensuring the success of any internal audit. These skills are paramount not only in identifying and mitigating risks but also in ensuring that businesses adhere to governance frameworks and regulatory requirements.

Exposure to the **SOX (Sarbanes-Oxley Act)** compliance framework has been particularly enlightening, as it helped solidify the connection between regulatory standards and real-world financial practices. The ability to assess and implement internal controls, identify gaps in business operations, and recommend corrective measures for better risk management has been an important learning outcome. This experience has deepened the appreciation of how essential it is for businesses to ensure compliance and uphold organizational integrity through structured audit processes.

Moreover, the comprehensive training provided on essential tools such as **Excel**, **PowerPoint**, **Alteryx**, **Visio**, and **AWS** has been instrumental in developing both technical and analytical skills. The hands-on experience gained through these tools has not only equipped with the necessary skills to handle data and visualize insights but also allowed for better comprehension of how these tools can streamline audit operations. Courses on **Pluralsight** further enhanced knowledge on data analysis, cloud technologies, and auditing techniques, reinforcing the technical expertise required for a successful career in this domain.

Another invaluable aspect of this internship has been the exposure to **leadership activities** and teamwork dynamics. It was realized that in a professional environment, **communication** and **collaboration** are just as critical as technical abilities. The opportunity to observe and interact with experienced auditors, attend team meetings, and discuss audit methodologies fostered both professional growth and interpersonal skills. Understanding how audit professionals navigate complex situations, make decisions, and communicate findings has been instrumental in developing a deeper understanding of the auditing profession.

Additionally, shadowing senior professionals during their daily audit activities provided insight into the practical application of audit theories, including the preparation and review of audit documentation, the conduct of risk assessments, and the execution of internal control tests. The observation of these tasks clarified the significant role of internal auditing in maintaining financial integrity, operational efficiency, and regulatory compliance within an organization. Overall, the internship has been a transformative experience that has expanded both technical and soft skills. While still in the learning phase, this internship has offered substantial exposure to core auditing concepts and practices, and reinforced the importance of continuous professional development. The experience has laid a strong foundation for the future, not only in terms of acquiring technical skills but also in understanding the value of process-driven approaches, ethical practices, and the importance of risk management and compliance in today's complex business environment.

CHAPTER 8

RECOMMENDATIONS

1. **Practical Exposure to Audit Projects:** Although the shadowing experience was invaluable, providing interns with more direct involvement in audit projects from the beginning could expedite the learning process. Allocating interns to assist with specific audit tasks under supervision (such as data collection, initial analysis, or documentation preparation) would allow for more hands-on learning and a better understanding of audit workflows.
2. **Regular Feedback and Mentorship Session:** Periodic feedback and mentorship sessions throughout the internship would enhance the intern's development. Structured reviews of progress, areas for improvement, and targeted suggestions for skill enhancement would help interns understand their growth trajectory and make necessary adjustments in their approach.
3. **Access to More Specialized Training Tools:** Offering access to specialized tools and resources that are specific to the internal audit domain, such as advanced audit software or risk management platforms, could enhance the technical skills of interns. Additionally, offering workshops on soft skills such as client communication, presentation skills, and conflict resolution could aid in personal development.
4. **Encourage Innovation and Creativity:** Create an environment that encourages interns to explore innovative ideas and contribute to ongoing projects. Empower interns with autonomy and resources to pursue their interests, participate in brainstorming sessions, hackathons, and design challenges to stimulate creativity and inspire new solutions to complex problems.
5. **Facilitate Networking Opportunities:** Organize networking events and activities to enable interns to connect with professionals from various departments. Plan meet-and-greet sessions, panel discussions, and industry tours where interns can interact with employees, alumni, and industry experts. Establish online networking platforms to facilitate ongoing communication and collaboration.

CHAPTER 9

CONCLUSION

The internship at KPMG has been a highly enriching and formative experience, providing an exceptional platform to transition from academic learning to real-world applications in the field of internal auditing and risk management within the financial services sector. The well-structured training, combined with hands-on exposure to audit processes, has not only expanded technical knowledge but also sharpened analytical thinking, problem-solving skills, and the ability to work effectively within a corporate setting.

Throughout the internship, significant progress has been made in mastering key auditing tools and platforms such as Microsoft Excel, PowerPoint, Alteryx, and AWS, which are essential in analyzing data, generating insights, and documenting audit results. The training on SOX (Sarbanes-Oxley Act) and internal controls has been particularly instrumental in understanding the regulatory environment and the importance of compliance in ensuring organizational integrity. Additionally, the exposure to risk management processes has underscored the significance of identifying, assessing, and mitigating potential risks that could impact business operations.

The shadowing experience with senior professionals has provided valuable insights into the day-to-day tasks of an internal auditor. Observing live audit workflows, testing internal controls, and assisting with documentation has not only solidified theoretical knowledge but also helped develop a deeper appreciation for the complexity and criticality of internal auditing in maintaining financial transparency and accountability. This exposure has demonstrated the pivotal role that internal auditors play in protecting the organization from potential risks and ensuring compliance with industry standards and regulations.

Moreover, the internship has highlighted the importance of soft skills such as communication, collaboration, and time management, which are essential for successful teamwork and client interaction. Through engaging with different teams, attending meetings, and participating in leadership activities, valuable interpersonal skills were developed that are crucial in a corporate environment.

As the internship progresses, there are still ample opportunities to gain further exposure to various audit projects and enhance practical knowledge. The continuous learning process, coupled with the guidance and mentorship from experienced professionals, will continue to build on the foundation established thus far. The experience gained during this internship will serve as a strong stepping stone for a career in internal auditing and risk management, offering insights into the importance of regulatory compliance, ethical practices, and the integration of

technology in modern auditing processes.

Overall, this internship has provided not only an opportunity to apply academic knowledge but also to develop the technical expertise, professional mindset, and soft skills needed to succeed in the field of internal auditing. It has reinforced the value of continuous learning, adaptability, and attention to detail, which are crucial in navigating the complexities of the financial services sector and contributing to the success of an organization.
