Department of Artificial Intelligence and Machine Learning

INTERNSHIP REPORT

ON

“Junior Software Developer”

BACHELOR OF ENGINEERING IN

Department of Artificial Intelligence and Machine Learning

Submitted by:

Rakshit Halijol - 1DS20AI046

Conducted at

incadea, India Pvt Ltd

Under the guidance of:

Prof. Rashmi K

Associate Professor
Dept. of AIML, DSCE

Himanshu Sharma

Development Manager
incadea, India

**Department of Artificial Intelligence and Machine Learning
Dayananda Sagar College of Engineering Bangalore-78**

DAYANANDA SAGAR COLLEGE OF ENGINEERING

Shavige Malleshwara Hills, Kumaraswamy Layout, Bangalore-560078
Department of Artificial Intelligence and Machine Learning

CERTIFICATE

This is to certify that the Internship titled “**Junior Software Developer**” carried out by **Mr RAKSHIT HALIJOL[1DS20AI046]**, a bonafide student of Dayananda Sagar College of Engineering, in partial fulfillment for the award of **Bachelor of Engineering**, in **Artificial Intelligence and Machine Learning** during the year 2023-2024. It is certified that all corrections/suggestions indicated have been incorporated in the report.

The internship report has been approved as it satisfies the academic requirements in respect course Internship (20AI8ICINT)

Signature of Reporting Head
Manoj Srinivasan
HR Manager
incadea, India

Signature of Internship Coordinator
Dr. Rashmi K
Dept. of AI & ML
DSCE

Signature of HoD
Dr. Vindhya P Malagi

D E C L A R A T I O N

I, **Rakshit Halijol**, final year student of Artificial Intelligence and Machine Learning, Dayananda Sagar College Of Engineering, Bangalore - 560078, declare that the Internship has been successfully completed, in **incadea, India Pvt Ltd**. This report is submitted in partial fulfillment of the requirements for the award of Bachelor Degree in Artificial Intelligence and Machine Learning, during the academic year 2023-2024.

Date:

USN: 1DS20AI046

Place: Bangalore

NAME: Rakshit Halijol

OFFER LETTER

Date: January 17, 2024

Personal and Confidential

Rakshit Halijola
H.No. 12-2-1, Pannala Mohalla,
Rangampet, Shorapur (Tq.),
Yadgir (Dist.), Karnataka - 585224

Dear Rakshit,

We have pleasure in offering the following opportunity of engaging you in our fresher's Training Program as trainee with Incadea India Private Limited (the "Company"). This letter includes the main conditions of service in the employment statement detailed below which comprise your contract of training ("Training Contract").

This contract is offered on the understanding that the first 6 months (till finish the final exams and complete the course) of your engagement will be viewed as probationary. The Company reserves the right to extend the training period by a further period for 6 months. During this period of 6 months, your performance will be reviewed and if found satisfactory, you will be offered long term trainee contract from incadea and your services will be confirmed on completion of successful training period. During the training period this contract can be terminated with fifteen day's notice without any reasons whatsoever.

Upon satisfactory completion of training period, the Company will confirm the Trainee's services. However, the Company reserves the right to confirm the Trainee even before the completion of the probationary period or to extend the probationary period or to terminate the services at any time on unsatisfactory performance at any time during the probationary period.

Employer	: incadea India Private Limited
Trainee's Name	: Rakshit Halijola
Date of Birth	: February 12, 2003
Job Title	: Jr Software Developer
Reporting to	: Syed Hasnain Amir
Department	: Development
Location	: Bangalore
Effecting Date of Appointment	: February 01, 2024
Basic Hours and Hours of work	: Your basic hours of work will be 40 hours per week as required by the Company.
Stipend	: Your stipend has been fixed at Rs.1,20,000 for 6 months ie., Rs. 20,000 per month (3 days attendance per week in a month, Rs. 12,000 per month).

- Personal Conduct : The management shall be at liberty to terminate your service without any notice in the event of: a) indiscipline, dishonesty or negligence of duty and non-performance b). You are being unable to attend the duties effectively in account of prolonged ill health. The decision of the competent authority shall be final and binding on you.
- Enclosed Documents : Non-Disclosure Agreement

We trust that you will find the terms and conditions of this offer acceptable. Please sign the duplicate copy of this contract letter and return to us as your acceptance of the engagement as trainee and terms/condition contained herein.

We wholeheartedly welcome you in our organization and look forward to a mutually beneficial association.

For incadea India Private Limited

Manoj Uppili Srinivasan

Manager - Human Resources

I have received the original letter of which this document is an exact copy and agree to accept this offer on the terms and conditions stated.

Signature of Trainee
Name: Rakshit Haljoi
Date: 18/01/2024

COMPLETION CERTIFICATE

Date: April 25, 2024

INTERNSHIP CERTIFICATE

To Whom IT May Concern

This is to certify that Mr. Rakshit Halijol (USN: 1DS20AI046), B.E. final year student of Dayananda Sagar College of Engineering, Bangalore has undergone an internship project with us.

The title of the project is "**Appraisal Management System (ASP.NET)**" and this was credited to his towards the fulfilment of the project completion of "Bachelor of Engineering in Artificial Intelligence and Machine Learning" from February 08, 2024 to April 25, 2024.

The project guide assigned was Mr. Syed Hasnain Amir, Development Manager, **incadea India Private Limited**. The source code of the Project and executable file setup is confidential in nature and is not issued to the trainee as per the non-disclosure policy of the company.

His conduct and performance have been satisfactory.

For incadea India Private Limited,

A handwritten signature in black ink that reads "Manoj". Below the signature is a circular blue stamp with the text "INCADIA PRIVATE LIMITED" around the perimeter and a small star at the bottom.

Manoj Uppili Srinivasan
Manager - Human Resources

ACKNOWLEDGEMENT

This Internship is a result of accumulated guidance, direction and support of several important persons. I take this opportunity to express my gratitude to all who have helped me to complete the Internship.

I express my sincere thanks to our Principal **Dr. B G Prasad**, for providing me adequate facilities to undertake this Internship.

I would like to thank **Dr. Vindhya P Malagi**, Head of Department – AI & ML, for providing me an opportunity to carry out Internship and for her valuable guidance and support.

I would like to **thank Mr. Syed Hasnain Amir** and my manager, **Mr. Himanshu Sharma** for guiding me during the period of internship.

I express my deep and profound gratitude to my Internship Co-ordinator, **Prof. Rashmi K**, Associate Professor – AI & ML, for her keen interest and encouragement at every step in completing the Internship.

I would like to thank all the faculty members of AI & ML department for the support extended during the course of Internship.

I would like to thank the non-teaching members of the Department of AI & ML, for helping me during the Internship.

Last but not the least, I would like to thank our parents and friends without whose constant help, the completion of Internship would have not been possible.

Rakshit Halijol [1DS20AI046]

CHAPTER 1

INTRODUCTION

Since joining Incadea in February 2024 as a Junior Software Developer at the Bengaluru office, my journey has been both enriching and dynamic. Beginning with comprehensive ASP.NET training and immersion in Microsoft's Business Central tools, I've gained invaluable insights into modern software development practices. The Business Central platform, in particular, has provided me with hands-on experience in efficiently storing and managing data, essential skills that form the backbone of any software project.

Transitioning from training to real-world application, I quickly became involved in an internal project centered around enhancing our company's performance appraisal system. This opportunity allowed me to put my newfound knowledge into practice, contributing to the development of a robust and user-friendly system. Collaborating with my peers and leveraging the functionalities of Business Central, I've been able to streamline processes and drive meaningful improvements in our internal operations.

As I continue to grow and contribute within the Incadea team, I am eager to further expand my skill set and take on new challenges. With a strong foundation in ASP.NET and Business Central, I am committed to delivering innovative solutions that positively impact our organization's objectives and drive continued success.

CHAPTER 2

DESCRIPTION OF ORGANIZATION

Incadea, India Pvt Ltd

Introduction

Incadea is a globally recognized leader in providing innovative software solutions for the automotive industry. With a strong presence across multiple continents, including Europe, Asia, Africa, and the Americas, Incadea has established itself as a trusted partner for automotive dealerships, manufacturers, and aftermarket service providers. The company specializes in developing cutting-edge software solutions tailored to meet the unique needs and challenges of the automotive sector.

One of Incadea's flagship offerings is its dealership management system (DMS), a comprehensive software suite designed to streamline operations, enhance customer engagement, and drive profitability for automotive retailers. From sales and inventory management to after-sales service and customer relationship management (CRM), Incadea's DMS empowers dealerships with the tools they need to succeed in today's competitive market.

In addition to DMS solutions, Incadea also provides a range of complementary products and services, including business intelligence tools, digital marketing solutions, and e-commerce platforms. These offerings enable automotive businesses to harness the power of data analytics, optimize their marketing strategies, and capitalize on the growing trend of online sales and service transactions.

With a focus on innovation, reliability, and customer satisfaction, Incadea continues to lead the way in driving digital transformation within the automotive industry. By leveraging cutting-edge technologies such as artificial intelligence, machine learning, and cloud computing, Incadea is helping automotive businesses adapt to the evolving landscape and thrive in an increasingly digital world.

Incadea offers a comprehensive suite of software products and solutions designed to meet the diverse needs of automotive retailers, manufacturers, and service providers. These solutions encompass various aspects of dealership operations, including sales, inventory management, after-sales service, customer relationship management (CRM), business intelligence, digital marketing, and e-commerce.

One of Incadea's flagship products is its dealership management system (DMS), a robust software platform that serves as the backbone of automotive retail operations. The Incadea DMS provides dealerships with a centralized platform for managing every aspect of their business, from sales and finance to parts and service. With intuitive user interfaces, customizable features, and seamless integration with other business systems, the Incadea DMS enables dealerships to optimize processes, improve efficiency, and enhance the overall customer experience. In addition to its DMS solution, Incadea offers a range of complementary products and services designed to help automotive businesses succeed in today's competitive market environment.

These include advanced business intelligence tools that provide actionable insights into dealership performance and market trends, digital marketing solutions that help dealerships attract and engage customers online, and e-commerce platforms that enable seamless online sales and service transactions.

MISSION STATEMENT

To help people see data in new ways, discover insights, and unlock endless possibilities.

Internship - Positions available at Incadea, India Pvt Ltd for the following Profiles

- Junior Software Developer
- Testing Engineer
- Consultant
- Support L3

CHAPTER 3

SCOPE OF WORK

PROBLEM STATEMENT

Incadea faces the challenge of modernizing its employee performance appraisal process to align with contemporary workplace demands. The current manual system lacks efficiency and fails to provide a comprehensive evaluation framework. To address this, there is a critical need to develop an online Employee Performance Appraisal System (PMED) that automates the appraisal process, facilitates 360-degree feedback, and establishes a centralized repository for maintaining individual performance histories. This system must ensure seamless navigation, customizable appraisal templates, and robust analytics to drive data-driven decision-making and foster continuous employee development. Through this initiative, Incadea aims to enhance performance transparency, foster a culture of feedback, and optimize workforce potential in achieving organizational objectives.

Introduction to incadea internal-product(PMED):

In the dynamic landscape of modern workplaces, traditional methods of employee performance appraisal are becoming increasingly outdated and inefficient. Recognizing the need for a more streamlined and comprehensive approach, Incadea aims to create an online system for Employee Performance Appraisal (PMED). The primary objective is to automate the performance appraisal process, enabling a 360-degree feedback mechanism conducted entirely online. Additionally, the system seeks to establish a centralized repository to maintain a comprehensive performance appraisal history for each employee, facilitating data-driven decision-making and fostering continuous improvement within the organization.

The current manual performance appraisal system at Incadea lacks scalability, real-time feedback mechanisms, and the ability to capture a holistic view of employee performance. This leads to challenges such as delayed appraisals, biased evaluations, and difficulty in tracking performance trends over time. By transitioning to an online system, Incadea aims to address these issues and unlock several key benefits, including increased efficiency, enhanced transparency, and improved engagement.

The proposed online PMED system will feature user-friendly interfaces for both employees and managers, facilitating seamless navigation and participation in the appraisal process. It will incorporate customizable appraisal templates, allowing for tailored evaluations based on specific job roles and performance criteria. Furthermore, the system will leverage advanced analytics and reporting functionalities to generate insightful performance dashboards and historical trends, empowering decision-makers with actionable insights to drive organizational success.

Overall, the implementation of the online PMED system represents a strategic initiative for Incadea to modernize its performance management practices, foster a culture of continuous feedback and development, and ultimately, maximize the potential of its workforce in achieving business objectives.

CHAPTER 4

LEARNING OBJECTIVES

1. Understanding Modern Performance Management Practices:

- Gain insight into contemporary performance management methodologies and their significance in the evolving workplace landscape.
- Explore the challenges associated with traditional performance appraisal systems and the need for modernization.

2. Familiarity with Online Appraisal Systems:

- Acquire proficiency in the development and implementation of online Employee Performance Appraisal Systems (PMED).
- Understand the technical requirements and functionalities necessary for automating the appraisal process and facilitating 360-degree feedback.

3. Data Management and Analysis Skills:

- Develop competency in managing and analyzing performance data within a centralized repository, such as Microsoft Dynamics Navision Business Central.
- Learn to extract meaningful insights from performance appraisal data to inform decision-making and drive continuous improvement initiatives.

4. User Interface Design and User Experience (UI/UX):

- Explore principles of user interface design and user experience to create intuitive and user-friendly interfaces for the PMED system.
- Understand the importance of seamless navigation, accessibility, and engagement in enhancing user satisfaction and adoption.

5. Customization and Flexibility in System Development:

- Gain hands-on experience in customizing appraisal templates to accommodate varying job roles, performance criteria, and organizational objectives.
- Learn to develop flexible and adaptable systems capable of scaling to meet the evolving needs of the organization.

6. Analytics and Reporting Capabilities:

- Develop proficiency in leveraging advanced analytics and reporting functionalities to generate insightful performance dashboards and historical trends.
- Understand the role of data visualization in conveying complex performance metrics in a clear and actionable manner.

7. Project Management and Collaboration:

- Acquire project management skills by participating in the development lifecycle of the PMED system, from requirements gathering to implementation and testing.
- Learn to collaborate effectively with cross-functional teams, including software developers, business analysts, and end-users, to ensure successful project outcomes.

8. Change Management and Adoption Strategies:

- Understand the importance of change management in transitioning from manual to online performance appraisal systems.
- Explore strategies for promoting user adoption, overcoming resistance to change, and fostering a culture of continuous feedback and development within the organization.

CHAPTER 5

CHALLENGES AND SOLUTION

a) Resistance to Change:

Challenge: Employees and stakeholders may resist transitioning from traditional manual appraisal methods to an online system due to familiarity with existing processes and apprehensions about technological adoption.

Solution: Implement a comprehensive change management strategy that includes communication, training, and stakeholder engagement to address concerns, build buy-in, and foster a culture of acceptance and enthusiasm for the new system.

b) Data Security and Privacy Concerns:

Challenge: Storing sensitive performance data online raises concerns about data security, confidentiality, and compliance with privacy regulations such as GDPR. Solution: Implement robust data security measures, including encryption, access controls, and regular audits, to safeguard employee information. Ensure compliance with relevant data protection laws and regulations through thorough risk assessments and policy enforcement.

Managing vast amounts of project data across multiple systems and platforms, leading to data silos, inconsistencies, and inefficiencies.

Solution: Implement a centralized data management system, such as Oracle Unifier, to consolidate project data and ensure data integrity. Utilize data integration tools like Project Integration Framework (PIF) to synchronize data between different systems and improve accessibility and accuracy.

c) Integration with Existing Systems:

Challenge: Integrating the online appraisal system with existing organizational systems, such as Microsoft Dynamics Navision Business Central, may pose technical challenges and require seamless data synchronization.

Solution: Conduct a thorough analysis of integration requirements and compatibility issues. Develop APIs or utilize middleware solutions to facilitate data exchange between systems, ensuring consistency and accuracy of information across platforms.

d) User Adoption and Engagement:

Challenge: Ensuring widespread adoption and active engagement with the new online appraisal system among employees and managers may be difficult, especially if the system is perceived as complex or burdensome to use.

Solution: Prioritize user experience (UX) design and usability testing to create intuitive, user-friendly interfaces. Provide comprehensive training and support resources to familiarize users with system functionalities and encourage participation. Gather feedback from stakeholders and iteratively improve the system based on user input.

e) Scalability and Performance:

Challenge: As the organization grows and the volume of performance appraisal data increases, scalability and system performance may become issues, leading to slow response times and system downtime.

Solution: Design the online appraisal system with scalability in mind, utilizing scalable cloud infrastructure and database technologies to accommodate growing data volumes and user loads. Implement performance monitoring and optimization measures to identify and address bottlenecks proactively.

HARDWARE AND SOFTWARE REQUIREMENTS

Software requirements:

- Data Base: MySQL
- Frameworks: ASP.NET, AngularJS
- API: RestAPI (ASP.NET Core Web API's)
- Programming Language: C#, JavaScript

Hardware Requirements:

- Notepad++ Editor
- Processor: Intel core i7 processor
- Hard Disk

CHAPTER 6

ACHEIVEMENTS AND CONTRIBUTION

System Design:

Automate the employee performance appraisal system in incadea to have a 360-degree feedback done online and also to maintain a performance appraisal history for each employee.

Fig 6.1. System Architecture

Database architecture refers to the structure and design of databases, encompassing elements such as data models, schemas, and storage mechanisms. It defines how data is organized, stored, accessed, and managed within a database system, ensuring efficiency, reliability, and scalability. Key components of database architecture include relational, NoSQL, or hybrid models, along with considerations for data normalization, indexing, replication, and backup strategies to support the organization's data management needs.

Fig 6.2. Database Schema Diagram

Business Central is an all-in-one business management solution from Microsoft, designed for small and medium-sized enterprises (SMEs). It offers comprehensive functionalities for financial management, supply chain, sales, service, and operations. With its cloud-based architecture, Business Central provides scalability, flexibility, and real-time insights to drive business growth and efficiency.

Fig 6.3. Overview of Business Central

CHAPTER 7

REFLECTION AND ANALYSIS

The Employee Performance Appraisal System (EPAS) at Incadea represents a pivotal initiative to revolutionize the evaluation process, ensuring that it aligns with contemporary workplace demands and fosters a culture of transparency and growth. At its core, the system is designed to provide a structured framework for appraisals, comprising two main components: competencies required for the role and objectives set by managers. These elements form the foundation upon which employee performance is assessed and measured. As the appraisal cycle commences, managers take the lead in defining objectives for their direct reports, with competencies being automatically populated based on predefined criteria established by HR.

This initial step lays the groundwork for a comprehensive evaluation process, setting clear expectations and goals for employees to strive towards throughout the appraisal period. Crucially, managers retain exclusive control over the objectives, ensuring that they accurately reflect the strategic priorities and developmental needs of their respective teams. As the appraisal period draws to a close, employees are afforded the opportunity to provide self-appraisal comments and ratings for each competency and objective. Once submitted, the system prohibits further modifications, signaling the commencement of the review phase. Managers receive prompt email notifications upon submission, prompting them to diligently review the appraisals and provide their own feedback and ratings. Moreover, the EPAS introduces a novel dimension to the appraisal process through its incorporation of 360-degree feedback. Managers have the ability to solicit input from additional participants, including peers, subordinates, and stakeholders, via a predefined questionnaire format.

This multi-dimensional feedback mechanism enriches the evaluation process, providing managers with a holistic perspective on employee performance from various vantage points within the organization. Ultimately, the EPAS serves as a catalyst for driving continuous improvement and employee development at Incadea. By embracing modern appraisal methodologies and leveraging innovative features such as self-appraisal, 360-degree feedback, and manager evaluation, the system empowers both managers and employees to engage in meaningful dialogue, set clear objectives, and chart a course towards professional growth and success.

WORK:

HR Level:

- HR users have access to a comprehensive dashboard where they can manage employee data, including adding new employees, defining competencies, and assigning positions. They also have visibility into the final appraisal forms for employees, enabling them to oversee the appraisal process from start to finish.

Fig 7.1. HR Level Landing Page

Manager Level:

- Managers have the ability to initiate the appraisal process by sending appraisal forms to their direct reports.

Fig 7.2. Manager Level Landing Page

- They can customize these forms with competencies relevant to each employee's role and responsibilities.
- Once the employee completes the self-appraisal, managers review and provide their own ratings before finalizing the appraisal.

The screenshot shows the 'Employee Level Landing Page' in the PMED system. The header includes the PMED logo, 'Home' and 'Privacy' links, and a user greeting 'Welcome, akash@gmail.com' with a 'Logout' button. The main content area is titled 'Hi, Employee' and features a table with three columns: 'Previous Appraisal', 'Pending Appraisal', and 'Activity'. The 'Previous Appraisal' column contains a card for a 'Completed Appraisal Form' (status: Completed) with details: 'Created Manager ID: 12', 'Start Date: 11-03-2024 00:00:00', 'End Date: 18-03-2024 00:00:00', and a 'Check Now' button. The 'Pending Appraisal' and 'Activity' columns both show 'No Results'. The footer displays '© 2024 - PMED - Privacy'.

Fig 7.3.Employee Level Landing Page

Employee Level:

- Employees receive the appraisal forms from their managers and provide self-appraisal ratings based on predefined competencies. After submitting their ratings, employees await their manager's review and finalization of the appraisal. Upon acceptance of the finalized form, the appraisal process for the employee is complete.

The screenshot shows the 'Final Appraisal Form' in the PMED system. The header includes the PMED logo, 'Home' and 'Privacy' links, and a user greeting 'Welcome, neha@gmail.com' with a 'Logout' button. The form contains the following fields: 'Employee ID:' with value '20', 'Employee Name:' with value 'Karan', 'Manager ID:' with value '4', 'Manager Name:' with value 'Susan', 'Objectives:' with value 'ML + Communication is required', 'Appraisal Start Date:' with value '10-03-2024 00:00:00', and 'Last Evaluation Date:' with value '17-03-2024 00:00:00'.

Fig 7.4. Final Appraisal Form of an Employee

CHAPTER 8

RECOMMENDATIONS

Flexible Training Schedule:

Offer interns the flexibility to choose their working hours, accommodating their individual preferences and schedules. By allowing interns to work during times that suit them best, you empower them to maintain a healthy work-life balance and optimize their productivity.

Structured Training Modules:

Develop structured training modules and resources to guide interns through the onboarding process and provide them with a clear roadmap for skill development. These modules should cover essential topics related to the company's technologies, processes, and culture, ensuring that interns receive comprehensive training that aligns with their learning objectives.

Mentorship Program:

Implement a mentorship program that pairs each intern with an experienced mentor who can provide guidance, feedback, and support throughout their internship. Mentors play a crucial role in facilitating learning, fostering professional growth, and helping interns navigate challenges effectively. Encourage mentors to schedule regular check-ins with their mentees and provide ongoing support and encouragement.

Hands-on Project Assignments:

Assign interns to hands-on project assignments that allow them to apply their knowledge and skills in real-world scenarios. These projects should be challenging yet achievable, providing interns with opportunities to learn new concepts, solve complex problems, and demonstrate their capabilities. Encourage interns to collaborate with their peers and mentors to tackle project tasks collaboratively and share their insights and learnings.

Feedback and Evaluation:

Provide interns with regular feedback and evaluation sessions to assess their progress, identify areas for improvement, and recognize their achievements. Feedback sessions should be constructive, specific, and actionable, highlighting interns' strengths and areas for development. Encourage interns to reflect on their experiences, set goals for their learning journey, and take ownership of their professional development. By fostering a culture of continuous feedback and improvement, you empower interns to maximize their potential and make meaningful contributions to the company.

CHAPTER 9

CONCLUSION

In conclusion, my internship at Incadea, India Pvt Ltd has been a transformative and enriching experience that has provided me with valuable insights, skills, and experiences in the field of Software Development process. Over the course of the internship, I have had the opportunity to immerse myself in a dynamic and innovative environment, where I gained hands-on experience with Internal product and worked on real-world projects such as Performance Appraisal Management System. Through intensive training sessions, practical project assignments, and collaboration with a diverse team of professionals, I have deepened my understanding of project management methodologies, tools, and best practices.

The internship has not only enhanced my technical skills but also helped me develop essential soft skills such as communication, teamwork, and problem-solving. I have learned to navigate through challenges, adapt to changing circumstances, and deliver effective solutions that drive project success. The mentorship and guidance provided by experienced professionals have been invaluable in shaping my learning journey and preparing me for future career opportunities in the construction and engineering industry.

Looking back on my internship experience, I am grateful for the opportunities for growth, learning, and personal development that I have encountered. I am confident that the knowledge, skills, and experiences gained during this internship will serve as a solid foundation for my future endeavors in the field of software development process. I am excited to apply what I have learned and continue my journey of professional growth and success in the industry. Overall, my internship at Incadea, India Pvt Ltd has been a rewarding and memorable experience that has prepared me for the challenges and opportunities that lie ahead in my career.
