Shavige Malleshwara Hills, Kumaraswamy Layout, Bangalore-560078

Department of Artificial Intelligence and Machine Learning

INTERNSHIP REPORT

ON

“Project Intern”

BACHELOR OF ENGINEERING IN

Department of Artificial Intelligence and Machine Learning

Submitted by:

Sahana N D - 1DS20AI048

Conducted at

Oracle Corporation

Under the guidance of:

Dr. Aruna M G

**Associate Professor
Dept. of AIML, DSCE**

Qadir Faki

**Consulting Practice Director
CEGBU, Oracle**

**Department of Artificial Intelligence and Machine Learning
Dayananda Sagar College of Engineering Bangalore-78**

DAYANANDA SAGAR COLLEGE OF ENGINEERING

Shavige Malleshwara Hills, Kumaraswamy Layout, Bangalore-560078
Department of Artificial Intelligence and Machine Learning

CERTIFICATE

This is to certify that the Internship titled “**Project Intern**” carried out by **Ms SAHANA N D[1DS20AI048]**, a bonafide student of Dayananda Sagar College of Engineering, in partial fulfillment for the award of **Bachelor of Engineering**, in **Artificial Intelligence and Machine Learning** during the year 2023-2024. It is certified that all corrections/suggestions indicated have been incorporated in the report.

The internship report has been approved as it satisfies the academic requirements in respect course Internship (20AI8ICINT)

Signature of Reporting Head
Ashish Mishra
Consulting Practice Manager
CEGBU, Oracle

Signature of Internship Coordinator
Dr. Aruna M G
Dept. of AI & ML
DSCE

Signature of HoD
Dr. Vindhya P Malagi
Dept. of AI & ML
DSCE

Private & Confidential

Reference: 219523

Dated: 14 December 2023
D, Sahana

Dear Sahana,

It is our pleasure to offer you student internship to work on a project with Oracle India Private Limited, IDC (the **Company**) by way of this internship letter.

Appointment

Your project location would be BENGALURU.

The duration of your internship will be from **17 January 2024** to **12 July 2024**. Any changes to the start and/or end date will be as agreed between the Company and you, and any extension of the internship will be based on mutual agreement.

Upon joining, you will be assigned a mentor from the Company who will brief you about the project and you will be required to carry out the project work under the guidance of a mentor.

Stipend

Under this internship, you will be paid a stipend of INR **50,000.00** per month, subject to applicable tax deduction. You will however, not be entitled to any other allowances or benefits given to the regular employees of the Company, other than what is set out in this letter.

You will arrange to take care of your tax related responsibilities as may be applicable to the aforesaid stipend payments or any other tax related matters in connection with your internship and the Company will not be liable for the same.

Termination

During your internship, you or the Company may terminate this internship by giving 10 calendar days' notice in writing or by Company making payment in lieu thereof.

The Company shall be entitled to terminate this internship with immediate effect (but without prejudice to the rights and remedies of the Company for any breach of this offer letter and to your continuing obligations under this offer letter) if you are guilty of dishonesty, serious or persistent misconduct, or without reasonable cause of neglect, or refusal to attend to your duties, or failure to perform any of your obligations, hereunder, or fail to observe the Company's disciplinary rules or any

other applicable regulations of the Company.

You will be responsible for the safe return of all properties of the Company, including any drawings, software, employee data, notebooks, manuals, documents, computerization of technical data, customer lists, specifications, files, memoranda, or other records of any nature belonging to the Company, or any reproduction thereof which may have been provided to you during the course of your internship with the Company, or which may be in your use, custody, care, or charge. For the loss of any property of the Company in your possession, the Company will have a right to assess the value of the loss on its own basis and recover the damages as it deems proper in the event of your failure to account for such material or property to its satisfaction.

On expiry or earlier termination of this internship, you shall immediately hand over all papers, documents, and other properties of the Company and the group companies as may be in your possession, custody, control, or power, including but not limited to any computers, computing equipment, computing devices, etc. as provided by the Company.

We are aware that as part of your education curriculum, you have to work on a project report and submit it to your college. We wish to inform you that the projects done at the Company would be the sole property of the Company. Consequently, all rights to such projects will remain solely the property of the Company. You will be required to prepare a project report under the guidance and review of the mentor; a copy of which will be retained by the Company for our records and the other copy can be submitted to your college.

You must also ensure that you have submitted the request/recommendation letter from your college for your internship at the Company with our Campus Team before you can commence on your internship.

On your successful completion of the internship, you will be provided with an internship certificate by the Company.

This internship letter shall be governed by and construed in accordance with the laws of India.

This internship letter is subject to the acceptance of the enclosed guidelines which are applicable during your project period.

Yours Sincerely,
For and on behalf of **Oracle India Private Limited, IDC**

Srihari Beldona
Group Vice President - Human Resources

Acknowledgement:

No signature is required from you upon acceptance of this offer. By clicking the acceptance button, you have agreed to be bound by the terms & conditions upon which the offer has been made. This contract is legally binding based on the laws of India.

COMPLETION CERTIFICATE

Oracle Internship Confirmation

Priya Venkataraman

This message was sent with High importance.

Dear Sir/Ma'am,

This is to certify that Sahana N D, pursuing (Department of Artificial Intelligence and Machine Learning 2024) in Dayananda Sagar College of Engineering, is working on internship project in Oracle under the supervision of Manager Mr. Qadir Faki. This email is issued for obtaining credits of internship. Her start date of internship is **17-Jan-2024.**

ORACLE

Priya Venkataraman, Campus Recruitment - 9971007435

Oracle India Pvt Ltd | Oracle Technology Park | Bannerughatta Road | Bengaluru-560029

ACKNOWLEDGEMENT

This Internship is a result of accumulated guidance, direction and support of several important persons. I take this opportunity to express my gratitude to all who have helped me to complete the Internship.

I express my sincere thanks to our Principal **Dr. B G Prasad**, for providing me adequate facilities to undertake this Internship.

I would like to thank **Dr. Vindhya P Malagi**, Head of Department – AI & ML, for providing me an opportunity to carry out Internship and for her valuable guidance and support.

I would like to **thank Mr. Qadir Faki** and my manager, **Mr. Ashish Mishra** for guiding me during the period of internship.

I express my deep and profound gratitude to my Internship Co-ordinator, **Dr. Aruna M G** , Associate Professor – AI & ML, for her keen interest and encouragement at every step in completing the Internship.

I would like to thank all the faculty members of AI & ML department for the support extended during the course of Internship.

I would like to thank the non-teaching members of the Department of AI & ML, for helping me during the Internship.

Last but not the least, I would like to thank our parents and friends without whose constant help, the completion of Internship would have not been possible.

Sahana N D [1DS20AI048]

CHAPTER 1

INTRODUCTION

In the fast-paced world of construction and engineering, the ability to seamlessly connect teams, processes, and data is paramount for project success. As an intern within Oracle's Construction and Engineering Global Business Unit (CEGBU), I have had the invaluable opportunity to delve into the innovative realm of cloud construction management software. This report encapsulates my journey and contributions during my internship tenure, focusing on the transformative role of Oracle's solutions in driving productivity, enhancing control, and fostering data-driven insights across construction projects.

Oracle's CEGBU stands at the forefront of revolutionizing the construction and engineering landscape with its comprehensive suite of cloud applications. By leveraging cutting-edge technology, CEGBU empowers organizations to streamline schedule management, enforce robust project and cost controls, and facilitate seamless design and construction coordination. The CEGBU ecosystem extends beyond traditional software offerings, encompassing a holistic Smart Construction Platform, including the Oracle Construction and Engineering Lobby account, which provides users with centralized access to projects and other essential applications.

Throughout the course of my internship, my primary objectives were twofold: to gain practical insights into the intricacies of construction project management and to actively contribute to enhancing project efficiency through the implementation and utilization of Oracle's CEGBU solutions. With a focus on schedule management, project cost controls, and design coordination, I embarked on a journey to assimilate theoretical knowledge with hands-on experience, ultimately aiming to make tangible contributions to ongoing projects within the organization.

CHAPTER 2

DESCRIPTION OF ORGANIZATION

Oracle Corporation

Introduction

Oracle Corporation is a multinational technology company renowned for its database software and cloud engineering services. Founded in 1977 by Larry Ellison, Bob Miner, and Ed Oates, Oracle has grown into one of the world's largest and most influential technology corporations. At its core, Oracle specializes in developing and marketing database software and technology, including cloudengineered systems, enterprise software products, and enterprise resource planning (ERP) software. The company's flagship product, Oracle Database, is widely used in businesses and organizations worldwide for managing and storing large volumes of data efficiently and securely. In addition to its database offerings, Oracle provides a comprehensive suite of cloud applications and platform services, catering to various industries such as finance, manufacturing, retail, and healthcare. These cloud services encompass areas like customer relationship management (CRM), enterprise resource planning (ERP), human capital management (HCM), supply chain management (SCM), and more.

The Oracle Global Business Unit (GBU) is a division within Oracle Corporation dedicated to serving the needs of global enterprises. It focuses on delivering industry-specific solutions and expertise to help organizations streamline their operations, enhance productivity, and drive innovation. The GBU works closely with clients across different sectors to understand their unique challenges and develop tailored solutions that leverage Oracle's cutting-edge technology and domain knowledge.

One of the key strengths of the Oracle GBU lies in its ability to provide end-to-end solutions that integrate seamlessly with existing IT infrastructures while also offering scalability and flexibility to meet evolving business requirements. Whether it's optimizing supply chains, improving customer experiences, or enhancing workforce management, the Oracle GBU aims to empower organizations to achieve their strategic goals and stay ahead in today's competitive landscape.

Through continuous innovation and investment in research and development, Oracle remains at the forefront of the technology industry, driving advancements in areas such as artificial intelligence, machine learning, blockchain, and the Internet of Things (IoT). With a global presence and a commitment to excellence, Oracle Corporation and its Global Business Unit continue to shape the future of enterprise technology and empower businesses to thrive in the digital age. Some of our products include the following:

- **Aconex:** A cloud-based platform for managing construction and engineering projects. Aconex facilitates document management, communication, collaboration, and workflow automation among project teams, contractors, and stakeholders.
- **Primavera P6:** A project portfolio management software used for planning, scheduling, and controlling large-scale and complex projects. P6 enables users to manage resources, track progress, analyze performance, and optimize project timelines and budgets.
- **Oracle Primavera Cloud (OPC):** A cloud-based project management solution that integrates with Primavera P6 and other Oracle applications. OPC provides real-time visibility into project performance, enabling teams to make informed decisions, mitigate risks, and drive project success.
- **Oracle Primavera Unifier:** An enterprise project portfolio management solution that helps organizations manage their capital projects and facilities portfolios. Unifier provides tools for project cost control, document management, schedule management, risk management, and collaboration, enabling organizations to deliver projects on time and within budget.

ABOUT THE COMPANY

About Oracle Corporation

Oracle is a US-based information technology (IT) company that provides a variety of business-oriented products and services, including Oracle Database, a relational database management system (RDBMS). Oracle was founded in California in 1977 by Larry Ellison, Bob Miner, and Ed Oates, and is one of the world's largest software and hardware companies.

Oracle's Global Business Unit (GBU) is a collection of seven business units that includes 33 acquired companies. The GBU's goal is to combine Oracle's financial services application assets to provide a comprehensive range of services

Oracle's Construction and Engineering Global Business Unit (CEGBU) is a part of Oracle Corporation that offers project management software and development software. CEGBU's Primavera products include project management software. Oracle's Project Management application suite is well known and helps project managers plan work, assign resources, forecast completion, and communicate with stakeholders.

MISSION STATEMENT

To help people see data in new ways, discover insights, and unlock endless possibilities.

Internship - Positions available at Oracle for the following Profiles

- Associate Consultant
- Application Developer
- Oracle Database Administrator
- Java Developer
- Financial Analyst

CHAPTER 3

SCOPE OF WORK

PROBLEM STATEMENT

During the internship at Oracle Corporation within the Construction and Engineering domain, several challenges emerged, necessitating focused attention and strategic solutions. Managing vast amounts of data across different platforms like Oracle Unifier and Project Integration Framework (PIF) posed significant complexity, leading to delays and inaccuracies in project planning and execution. Bridging the gap between theoretical training and practical application proved challenging, hindering project progress and team productivity. Integrating various Oracle CEGBU solutions with existing project management systems faced compatibility issues, resulting in data silos and communication bottlenecks. Additionally, suboptimal project planning and execution processes, characterized by manual workflows and limited visibility, led to cost overruns and schedule delays. Addressing these challenges presents opportunities for streamlining data management workflows, implementing structured knowledge transfer mechanisms, enhancing integration strategies, and leveraging Oracle CEGBU solutions to optimize project planning and execution. By doing so, the aim is to enhance project performance, deliver greater value to stakeholders, and drive innovation within the Construction and Engineering domain.

Introduction to Oracle CEGBU Products

Oracle Construction and Engineering Global Business Unit (CEGBU) offers a comprehensive suite of innovative solutions tailored to meet the complex demands of the construction and engineering industry. These cutting-edge products are designed to streamline project management processes, enhance collaboration, and drive efficiency across the project lifecycle. From planning and scheduling to execution and delivery, Oracle CEGBU products empower organizations to optimize resources, mitigate risks, and achieve project success.

Among the flagship products within the Oracle CEGBU portfolio are Primavera P6, Aconex, Unifier, Oracle Primavera Cloud, and Project Integration Framework (PIF). Each of these solutions plays a vital role in enabling seamless communication, data integration, and decision-making within construction and engineering projects.

Primavera P6 stands as a cornerstone in project portfolio management, offering robust tools for planning, scheduling, and controlling projects of any size or complexity. Its advanced features facilitate efficient resource management, critical path analysis, and real-time progress tracking, empowering project teams to stay on schedule and within budget.

Aconex Construction Management provides a centralized platform for collaboration, document management, and project information exchange. By connecting stakeholders, streamlining workflows, and ensuring data integrity, Aconex enhances transparency and accountability across the project lifecycle, ultimately driving project success.

Unifier serves as a comprehensive project controls solution, offering modules for cost management, schedule management, and risk management. With its configurable workflows and advanced reporting capabilities, Unifier enables organizations to standardize processes, mitigate risks, and optimize project performance.

Oracle Primavera Cloud brings together owners and delivery teams on a unified platform, facilitating shared planning, scheduling, and resource management. Its cloud-based architecture enables seamless collaboration between office and field teams, driving productivity and enhancing decision-making capabilities.

Project Integration Framework (PIF) acts as a bridge between different Oracle CEGBU products, enabling seamless data integration and synchronization. By facilitating interoperability and eliminating data silos, PIF enhances the efficiency and effectiveness of project management processes.

Together, these Oracle CEGBU products represent a comprehensive ecosystem of solutions designed to address the diverse needs and challenges of the construction and engineering industry. By harnessing the power of these innovative technologies, organizations can achieve greater project visibility, control, and ultimately, success.

CHAPTER 4

LEARNING OBJECTIVES

1. Comprehensive Understanding of Oracle CEGBU Products:

Gain in-depth knowledge of the features, functionalities, and capabilities of Oracle CEGBU products through hands-on exploration and training sessions. Understand how each product (Primavera P6, Aconex, Unifier, Oracle Primavera Cloud, and Project Integration Framework) contributes to the construction and engineering project lifecycle. Explore use cases and real-world examples to grasp the practical applications of these products in managing construction projects, from planning and scheduling to execution and delivery.

2. Data Management and Integration Skills:

Learn effective data management strategies, including data validation, cleansing, and transformation, to ensure the accuracy and integrity of project data. Understand the process of integrating data across different platforms and systems, such as Oracle Unifier and Project Integration Framework (PIF), to facilitate seamless information exchange and collaboration. Acquire proficiency in using data management tools and techniques to maintain data consistency, accessibility, and security throughout the project lifecycle.

3. Project Planning and Control Competencies:

Develop a deep understanding of project planning methodologies, including critical path analysis, resource leveling, and milestone tracking, using tools like Primavera P6. Learn how to create and maintain project schedules, allocate resources effectively, and monitor progress against baseline plans to ensure project objectives are met on time and within budget. Gain insights into project control techniques, such as variance analysis and change management, to identify deviations from the plan and implement corrective actions as needed.

4. Collaboration and Communication Skills:

Enhance collaboration skills by actively participating in project teams, engaging with stakeholders, and fostering a culture of open communication and knowledge sharing. Learn how to effectively communicate project updates, risks, and issues to team members, clients, and other stakeholders using appropriate communication channels and tools. Develop interpersonal skills to build strong relationships with project stakeholders, resolve conflicts, and negotiate mutually beneficial solutions to project challenges.

5. Problem-Solving and Decision-Making Abilities:

Develop problem-solving skills to analyze complex project issues, identify root causes, and develop practical solutions that align with project objectives and constraints. Learn decision-making techniques to evaluate alternative courses of action, assess risks and benefits, and make informed decisions in a timely manner to keep projects on track. Enhance critical thinking skills to anticipate potential challenges, proactively identify opportunities for improvement, and drive continuous improvement initiatives within project teams.

CHAPTER 5

CHALLENGES AND SOLUTION

a) Data Management Complexity:

Challenge: Managing vast amounts of project data across multiple systems and platforms, leading to data silos, inconsistencies, and inefficiencies.

Solution: Implement a centralized data management system, such as Oracle Unifier, to consolidate project data and ensure data integrity. Utilize data integration tools like Project Integration Framework (PIF) to synchronize data between different systems and improve accessibility and accuracy.

b) Communication and Collaboration Barriers:

Challenge: Limited communication and collaboration among project stakeholders, resulting in misunderstandings, delays, and errors.

Solution: Deploy collaboration platforms like Aconex to facilitate real-time communication, document sharing, and collaboration among project teams, contractors, and clients. Implement standardized communication protocols and hold regular meetings to ensure alignment and transparency throughout the project lifecycle.

c) Schedule and Resource Management Challenges:

Challenge: Difficulty in managing project schedules and resources effectively, leading to overruns, delays, and resource shortages.

Solution: Utilize project management software such as Primavera P6 to develop detailed project schedules, allocate resources efficiently, and track progress against baseline plans. Implement resource leveling techniques to optimize resource utilization and minimize conflicts.

d) Integration and Compatibility Issues:

Challenge: Difficulty in integrating various software systems and platforms used in construction and engineering projects, resulting in data silos and workflow disruptions.

Solution: Implement robust integration strategies, leveraging APIs and middleware solutions, to facilitate seamless data exchange between different systems. Ensure compatibility and interoperability between Oracle CEGBU products and other third-party software solutions by following industry standards and best practices.

e) Change Management and Adoption:

Challenge: Resistance to change among project teams and stakeholders, hindering the adoption of new technologies and processes.

Solution: Implement change management strategies to communicate the benefits of adopting new tools and processes, provide training and support to users, and address concerns and resistance proactively. Foster a culture of continuous learning and improvement to encourage experimentation and innovation within the organization.

By addressing these challenges proactively and implementing effective solutions, construction and engineering projects can improve efficiency, reduce risks, and deliver better outcomes for all stakeholders involved.

HARDWARE AND SOFTWARE REQUIREMENTS

Software requirements:

- Data Base: MySQL, OracleDB
- Server: Oracle cloud
- API: Rest-API, SOAP API
- Programming Language: Java

Hardware Requirements:

- Notepad++ Editor
- Processor: Intel core i7 processor
- Hard Disk

CHAPTER 6

ACHEIVEMENTS AND CONTRIBUTION

System Design:

The Unifier Accelerator includes preconfigured, connected business processes to help manage your project and portfolio costs, forecasting, cash flow, funding, contracts, risk, and schedule milestone tracking.

Fig 6.1. Unifier Overview

Aconex is part of Oracle's common data environment (CDE)—a single, central platform that connects teams, project data. The unique data ownership model and rigorous security protocols build trust, driving greater adoption, which yields more project data and insights.

Fig 6.2. Aconex Overview

Oracle Primavera Cloud brings together office and field teams, synchronizing schedules and resources and empowering the thousands of decisions that engineering and construction professionals make every day on projects all over the world. See how connected scheduling helps reshape project delivery.

Fig 6.3. Primavera P6 Overview

CHAPTER 7

REFLECTION AND ANALYSIS

During my internship at Oracle Corporation within the Construction and Engineering domain, I experienced a dynamic and immersive learning journey that provided invaluable insights into the complexities and challenges of managing construction projects in a rapidly evolving industry landscape. The internship offered a unique opportunity to gain hands-on experience with Oracle CEGBU products, including Primavera P6, Aconex, Unifier, Oracle Primavera Cloud, and Project Integration Framework (PIF). Through intensive training sessions and practical project assignments, I developed a comprehensive understanding of these tools and their applications in optimizing project planning, execution, and management processes.

One of the key highlights of the internship was the exposure to real-world projects, such as the TRANSNET project, where I had the opportunity to apply my newly acquired skills in data management and integration. Working on TRANSNET allowed me to navigate through the complexities of managing project data across different platforms and systems, while also honing my problem-solving and decision-making abilities. Challenges such as data synchronization issues and integration complexities provided valuable learning opportunities, allowing me to develop innovative solutions and strategies to overcome them. Another aspect of the internship that I found particularly rewarding was the opportunity to collaborate with a diverse team of professionals, including project managers, engineers, and software developers. The collaborative environment fostered open communication, knowledge sharing, and teamwork, enabling us to leverage each other's strengths and expertise to deliver successful project outcomes. Through this collaboration, I not only expanded my technical skills but also developed interpersonal skills such as effective communication, teamwork, and conflict resolution. The internship also underscored the importance of continuous learning and adaptation in an ever-changing industry landscape. Technologies and methodologies evolve rapidly, and staying updated with the latest trends and developments is essential for staying competitive. The training sessions and exposure to cutting-edge technologies provided by Oracle CEGBU equipped me with the skills and knowledge needed to adapt to these changes and drive innovation within the construction and engineering domain.

A User-defined report (UDR) is a customizable report that can be run at the project, shell, program, and company level (user mode).

CHAPTER 8

RECOMMENDATIONS

Flexible Training Schedule:

Offer interns the flexibility to choose their working hours, accommodating their individual preferences and schedules. By allowing interns to work during times that suit them best, you empower them to maintain a healthy work-life balance and optimize their productivity.

Structured Training Modules:

Develop structured training modules and resources to guide interns through the onboarding process and provide them with a clear roadmap for skill development. These modules should cover essential topics related to the company's technologies, processes, and culture, ensuring that interns receive comprehensive training that aligns with their learning objectives.

Mentorship Program:

Implement a mentorship program that pairs each intern with an experienced mentor who can provide guidance, feedback, and support throughout their internship. Mentors play a crucial role in facilitating learning, fostering professional growth, and helping interns navigate challenges effectively. Encourage mentors to schedule regular check-ins with their mentees and provide ongoing support and encouragement.

Hands-on Project Assignments:

Assign interns to hands-on project assignments that allow them to apply their knowledge and skills in real-world scenarios. These projects should be challenging yet achievable, providing interns with opportunities to learn new concepts, solve complex problems, and demonstrate their capabilities. Encourage interns to collaborate with their peers and mentors to tackle project tasks collaboratively and share their insights and learnings.

Feedback and Evaluation:

Provide interns with regular feedback and evaluation sessions to assess their progress, identify areas for improvement, and recognize their achievements. Feedback sessions should be constructive, specific, and actionable, highlighting interns' strengths and areas for development. Encourage interns to reflect on their experiences, set goals for their learning journey, and take ownership of their professional development. By fostering a culture of continuous feedback and improvement, you empower interns to maximize their potential and make meaningful contributions to the company.

CHAPTER 9

CONCLUSION

In conclusion, my internship at Oracle Corporation has been a transformative and enriching experience that has provided me with valuable insights, skills, and experiences in the field of construction and engineering project management. Over the course of the internship, I have had the opportunity to immerse myself in a dynamic and innovative environment, where I gained hands-on experience with Oracle CEGBU products and worked on real-world projects such as TRANSNET. Through intensive training sessions, practical project assignments, and collaboration with a diverse team of professionals, I have deepened my understanding of project management methodologies, tools, and best practices.

The internship has not only enhanced my technical skills but also helped me develop essential soft skills such as communication, teamwork, and problem-solving. I have learned to navigate through challenges, adapt to changing circumstances, and deliver effective solutions that drive project success. The mentorship and guidance provided by experienced professionals have been invaluable in shaping my learning journey and preparing me for future career opportunities in the construction and engineering industry.

Looking back on my internship experience, I am grateful for the opportunities for growth, learning, and personal development that I have encountered. I am confident that the knowledge, skills, and experiences gained during this internship will serve as a solid foundation for my future endeavors in the field of construction and engineering project management. I am excited to apply what I have learned and continue my journey of professional growth and success in the industry. Overall, my internship at Oracle Corporation has been a rewarding and memorable experience that has prepared me for the challenges and opportunities that lie ahead in my career.
